

Geography Knowledge

People use transport to travel to different places. There are many different types of transport such as: bicycles, scooters, trains, buses, taxis, airplanes, boats or walking. Some are more environmentally friendly than others.

Types of **sustainable transport** include: walking, cycling and using public transport such as trams, buses or trains.

A map is a picture or drawing showing selected features of an area. We use maps to help us plan a route to travel from one place to another.

There are 4 compass directions: North, East, South, West.

Geography Vocabulary

Word	Definition
Travel	To journey from place to place.
Cycle Path	A track for use by bicycles separate from motor traffic.
Bike Shed	A small building for storing bicycles.
Jobs	A regular role where someone is paid to do particular tasks.
